

Ferroelectricity in Atomic Layer Deposited Wurtzite Zinc Magnesium Oxide $\text{Zn}_{1-x}\text{Mg}_x\text{O}$ (Supplemental Document)

As stated in the abstract, ferroelectric switching was demonstrated by PFM amplitude and phase hysteresis loops. These are shown in the figure below for films containing $x = 0.46$ and $x = 0.58$ in $\text{Zn}_{1-x}\text{Mg}_x\text{O}$.
